REQUIREMENTS

for defining and reviewing frequency of submitting PSUR for medicinal products, vaccines, tuberculin by INN of API or combinations of API

1. Frequency of submitting PSUR for medicinal products, vaccines, tuberculin (hereinafter – medicinal products) by INN of API or combinations of API (hereinafter - frequency of submitting PSUR) shall be defined and reviewed by Public Enterprise "The State Expert Center of the Ministry of Health of Ukraine" (hereinafter – the Center).

2. The frequency of submitting PSUR shall be published on the Center's web-site including the following information:

- 1) INN of API or combinations of API;
- 2) PSUR submission frequency by INN of API or combinations of API;
- 3) data lock points;
- 4) PSUR submission date;
- 5) publication date.

3. Criteria for defining frequency of submitting PSUR:

- 1) information on risks or benefits that may have an impact on patient's health and life;
- 2) new medicinal product for which there is limited safety information available to date (includes pre- and post-registration experiences);
- 3) significant changes to the medicinal product (e.g. new indication has been registered, new presentation or route of administration broadening patient population using medicinal product);
- 4) vulnerable/poorly studied patient populations, missing information (e.g. children, pregnant women) while these patient populations are likely to use medicinal product in the post-registration period;
- 5) signal of potential hazard or potential hazard for misuse, medication error, risk of overdose or drug dependency;
- 6) availability of safety data related to use of medicinal product;
- 7) medicinal products subjected to additional monitoring.

4. Criteria for reviewing frequency of submitting PSUR:

- 1) new information about properties of medicinal product (components) emerged/was revealed, which may affect the API or combinations of API risk/benefit ratio and potentially the public health;

- 2) any change of criteria used to define frequency of submitting PSUR;
- 3) on applicant's request because of reasons related to public health; to avoid duplication of evaluation; to achieve international harmonization;
- 4) newly registered API.
5. If necessary, applicants submit applications for appropriate changes to registration materials during the validity period of registration certificate in due order except for cases when registration certificate has the explicit reference to frequency of submitting PSUR.

* For medicinal products, vaccines, tuberculin containing API or combinations of API not mentioned in this annex, dates of submitting PSUR shall comply with the standard schedule of submitting PSUR for each medicinal product starting with its international birth date.

** For medicinal products which were registered in Ukraine before 2012 the frequency of submitting PSUR – in compliance with this annex; for medicinal products registered in Ukraine as in the first country in the world after 2012, the frequency of submitting PSUR – taking in account the frequency of submitting PSUR as for medicinal product registered in Ukraine as in the first country in the world or as first in any other country of the world, for each medicinal product, but not rarer than mentioned in this annex.
